Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, 39-42, 45-56, 59-65, 71-72 are drawn to product ID generation and classification in a taxonomy, and creating product specifications being an application of a database, classified in class 707, subclass 104.1.
 - II. Claims 34-38, 43-44, 57, 58, 66-70 are drawn to Web crawling to collect product information being remote data access, classified in class 707, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the classification can take place on a collection of product data that exists in a single file system or database without the need for a web crawler. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2167

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Marc Kaufman on 14 February 2005 to request an oral election to the above restriction requirement, but did not result in an election being made as the applicants representative was not in to respond and has been unable to respond in a reasonable period. (In other words the examiner attempted to call got an answering machine and left a message.)

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Further if the applicant wishes he may respond by telephone as the election and correction to claim dependency may be resolved through telephone practice and the cases be acted on the merits soon thereafter.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Note: although the dependency of claim 37 is on claim 30, which depends on independent claim 23 of group I, claim 37 was placed in group II as the material of claim 37 has no antecedent basis in group I, however, would have if it depended on claim 34 of group II. The

Art Unit: 2167

applicant is requested to check the dependence of claim 37. Claims 57 and 58 may also be displaced but there is no such evidence to support the reasoning.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack M Choules whose telephone number is (571) 272-4109. The examiner can normally be reached on M-F (7:30-4:00).
